September 19, 2018

Dear parents,

Beautiful Savior Lutheran School has purchased licenses for all BSLS students in kindergarten - grade 8 to have a **Keyboarding Without Tears** account which will allow students to learn proper keyboarding and technology responsibility.

Keyboarding without Tears is an online resource that allows students to learn proper keyboarding strokes, general computer readiness, and digital citizenship that coincides with our Literacy with Information and Communication Technology curriculum by Manitoba Education and Training.

All of the classrooms will go to the technology lab one time per week to do the Keyboarding Without Tears program. The students may need and/or want to continue to work on the skills at home. Once students are familiar with the program, the teacher will input your email in the system and your child's log in information will be emailed directly to you. Your child's teacher will notify you when this is happening.

Keyboarding Without Tears is available to be used on a desktop computer, laptop or tablet with the student log in.

The teacher has a teacher account on Keyboarding Without Tears and can see what activities the students are completing along with the areas they are challenged with and see the areas where they are excelling.

If you have any questions, please do not hesitate to contact your teacher. Please sign below to give your child permission to use Keyboarding Without Tears at BSLS and for at home use. I give permission for BSLS to provide Keyboarding Without Tears with a parent email address for the student log in information.

Student Name: _____

Parent Signature: _____ Date: _____

Thank you for your support.
