September 19, 2018

Dear parents,

Beautiful Savior Lutheran School has purchased licenses for all BSLS students in grades 2-8 to have a **Mathletics** account which will allow teachers to personalize learning for all students!

Mathletics is an online resource that allows students to learn anytime, anywhere, with material that is uniquely appropriate for them. Students will strengthen their math skills by using interactive practice and tutorials. This will be a *supplement* to our regular math program. Students may be assigned homework on Mathletics and may be required to login at home. They may also login to Mathletics for extra fun, such as doing math activities (Manitoba curriculum based), race against others in the school and world to complete equations, and earn points to manipulate their avatar. Mathletics is available on any web-enabled device at [mathletics.ca](http://mathletics.ca).

The teacher has a teacher account on Mathletics and can see what activities the students are completing along with the areas they are challenged with and see the areas where they are excelling. The teacher may assign 'homework' to students before other activities can be completed. As students learn and complete activities, their progress is reported back to the teacher.

If you have any questions, please do not hesitate to contact your teacher. Please sign below to give your child permission to use Mathletics at BSLS.
