Insect Scavenger Hunt

It is always exciting teaching children through fun and games. Through a scavenger hunt we can teach them problem-solving, teamwork, and exercise. You can get children moving and running from finding one bug to the next. Toddlers, preschoolers and older children alike will love hunting under stones and looking through the grass to see what insects they can find!

WHAT WILL YOU NEED:

- Magnifying glasses
- Sticks for digging around

WHAT TO DO:

Start by finding a place to look for bugs. Backyard gardens or nearby green spaces are good places to start. Look under stones, behind logs and on leaves. Look for the following – :

Ladybugs

Ants

Worms

Grasshoppers

Spiders

Beetles

Caterpillars

Butterflies

Moths
